## Introduction dee

Umo Editor is open-source document editor based on Vue3 and Tiptap. Umo Editor provides comprehensive document editing capabilities and AI creation features, supports pagination, supports Markdown syntax, offers basic rich text editing functions, allows for the insertion of various node types in multiple formats, provides a variety of practical tools, and supports setting page styles. It also supports exporting in various formats, printing and print preview, block-level document editing, adding custom extensions, multi-language settings, and a dark theme.

As a standalone Vue3 plugin, Umo Editor can be easily integrated into any Vue3 project with zero configuration. For non-Vue3 projects, you can embed Umo Editor using an Iframe.

Design Philosophy

The birth of Umo Editor aims to address the complexity of document editing in web applications, providing open-source and free powerful editing capabilities and pagination modes similar to Microsoft Word for web projects, while maintaining the convenience of web applications. Whether it's government and enterprise information management systems, academic research writing, team document collaboration, knowledge base management, or personal note organization, Umo Editor can be your capable assistant.

Open Source Advantages

Free to Use: As an open-source project, Umo Editor is freely available to all developers under the [MIT License](#), with no copyright concerns.

Continuous Updates: Umo Editor will continue to iterate, constantly optimizing features and enhancing user experience.

Customizable Development: Open source means greater flexibility. Developers can customize the development according to project needs to create a unique document editor.

Core Features

Zero-config out-of-the-box usability

Pagination mode similar to that in Microsoft Word

Lightweight

WYSIWYG (What You See Is What You Get) throughout the process

Rich-text editing capabilities

Markdown syntax support

Integrated practical tools

Presentation mode

Document export and sharing

Page settings

AI Assistant

Support for printing and print preview

Support for custom plugins

Shortcut key support

Theme customization

Multi-language settings

Dark mode support

For more detailed introductions, see [Core Features](#).

Browser Support

Browser	Version	Support
Google Chrome	Latest	■
Firefox	Latest	■
Safari	Latest	■
Microsoft Edge	Latest	■
Internet Explorer (IE)	All	■

Node.js Version Support

Node.js 18.0.0 or above.

Join the Community

We encourage users to join the Umo Editor open-source community and participate in the development and improvement of the product. Whether submitting bug reports, feature requests, or code contributions, all are valuable parts of our community.

You can submit issues or suggestions via https://github.com/umodoc/editor/discussions.

Or submit bug reports via https://github.com/umodoc/editor/issues.

Contribute Code

The development of Umo Editor could not have been possible without the support of the community. Below is the list of contributors who have contributed code to Umo Editor. We extend our thanks to them:

[Umo Team](#): ■■■ Core developers

[Cassielxd](#): ■■ Implemented pagination and many important features for Umo Editor

Na'aman Hirschfeld:■■ Enhanced TypeScript support, added tests, and provided a stronger foundation for Umo Editor's development

SerRashin: ■■ Added Russian language support for Umo Editor

ChenErik: ■■ Contributed code to Umo Editor

china-wangxu: ■■ Contributed code to Umo Editor

xuzhenjun130: ■■ Contributed code to Umo Editor

We welcome all forms of contributions, including but not limited to submitting bug reports, feature requests, and code contributions.

Contact Us

If you have any questions or suggestions, please contact us through the following methods. Before that, it is recommended to read this document carefully to understand how to use Umo Editor.
